

GCS Series Generator Cordsets

Marinco Power Products introduces the GCS series generator cordsets. Our heavy duty, super flexible industrial-grade cable is available in 20A and 30A configurations of different lengths and wiring device configurations. Both plug and connector ends are molded to fit the contour of your hand. The plug blades and connector can be easily lined up to positively secure the cordset. Our generator cordsets are ideal for connecting generators to transfer switches/panels/inlets and are designed for longevity in harsh environments.

STOW 10 AWG & 12 AWG options with yellow color
